

IN THE ABSTRACT OF THE DISCLOSURE:

Please amend the abstract of the disclosure, which appears on page 14 of the specification, as follows:

ABSTRACT OF THE DISCLOSURE

A temperature control apparatus having ~~which is easy to replace~~ a heat exchange unit that is easy to replace for enhancing to enhance the maintainability and ~~the~~ space efficiency, and ~~which~~ a structure that can absorb the thermal expansion/shrinkage of a heat exchanger ~~is provided~~.

The temperature control apparatus comprises: a heat exchanger (11) having a passage (31) for passing a fluid; a connecting pipe (21) connected to the passage of the heat exchanger; a passage block (16) having a passage for passing the fluid to the heat exchanger; a relay block (15) for forming a passage between the passage of the passage block and the connecting pipe; and sealing ~~means~~ member (14) for connecting the connecting pipe movably to the passage of the relay block.

In the temperature control apparatus, the length of the connecting pipe (21) is made substantially equal to or slightly shorter than the spacing between the heat exchanger (11) and the passage block (16). --
